

STAR PROGRAMME 2014-2015

Monday 3rd November 2-00 PM in the Methodist Hall:

On Monday 3rd November **Robin Wilcockson** has agreed to give us a talk entitled '[Aspirin – Past, Present and Chemical Engineering](#)'. Robin will speak of his involvement with the process development, manufacturing and European marketing of aspirin.

He will outline the history of Aspirin and how it works – work that lead on to, what was then, new uses for Aspirin. He will also relate this to his time teaching at Loughborough University.

Monday 1st December 2-00 PM in the Methodist Hall:

On Monday 1st December, **Stan Miller** will be telling us about his '[Encounters with Science](#)'.

Monday 6th January:

NO MEETING WILL BE HELD ON MONDAY 6th JANUARY BECAUSE OF THE CHRISTMAS/NEW YEAR HOLIDAY PERIOD.

Monday 2nd February 2-00 PM in the Methodist Hall:

On Monday 2nd February 2015, **Graham Payne** will be telling us about some common human parasitic diseases in his talk '[A can of Worms](#)'.

I enjoyed Graham's first talk and judging by the feedback that I received I was not the only one. Many people have requested a follow-up by Graham and this looks like being better than last time.
